Re: Humber College Sailing Centre
Project No. 00-101

Dear John,

As you are aware, completion of the Humber College Sailing Centre will be evident when final reviews and inspections are concluded.

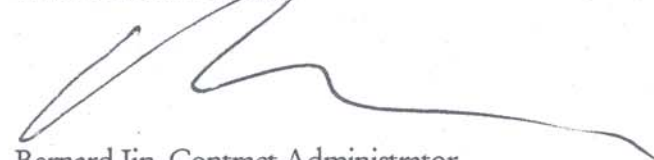

We have been in the Architect / Contractor relationship with your company throughout the construction period between November and May so we are writing to express our deep appreciation of your commitments to the design of this exciting and new facility for Humber College's Sailing Centre.

Your site Manager Paul Chiang has consistently balanced this project's difficult constraints from the initial tender period and we are excited that it has been completed as intended. His leadership and expeditious processing of complex factors including some difficult site constraints created an environment for uncompromising and beautiful solutions.

We are very impressed with the site leadership provided by Val Pittelli. At the beginning of his superintendent period on site, a dramatic construction evolution and momentum took place with incredible results in spite of weather and supply conditions. Effective communication and a close relationship with our office, the owner, and subtrades led to a completed project with successful sequence, order, and originality. Val's ability to communicate and organize the trades led to an excellent product we should all be proud of.

We wish to thank you for your commitment to the project and would look forward to working with you, Paul and Val again.

Yours truly,
TEEPLE ARCHITECT INC.
